140 séances structurées - 120 x 60 min et 20 x 90 min

Cycliste intermédiaire - cibles en % de FTP - cadence libre

Organisation

- Chaque catégorie est une échelle de 10 niveaux de charge (L01 facile -> L10 dur).
- Chaque niveau existe en deux variantes A et B : structure différente, charge identique (TSS à +/- 2).
- Monter d'un niveau toutes les 1 à 2 semaines ; alterner A et B pour varier.
- Si un niveau échoue (perte de plus de 5 % sur le dernier bloc), le répéter ou redescendre d'un niveau.

TSS et note Zwift

- TSS : charge estimée à partir des puissances prescrites (durée x intensité au carré).
- Note Zwift (« Effort », x/5) : l'indice de difficulté affiché dans le sélecteur de séances Zwift. Il dépend surtout de l'intensité (puissance normalisée) : une séance VO2max est mieux notée qu'un sweet spot de même TSS.
- Les notes sans « ≈ » ont été relevées dans Zwift ; celles avec « ≈ » sont prédites par un modèle calé sur 56 séances observées (52/56 exactes, le reste à 0,5 près). Pour les séances de 90 min, la prédiction est plus incertaine.

Index de toutes les séances 2

Endurance - 60 min 20 séances - TSS 27 à 54 - Zwift 1 à 2/5 4

Zone 2 jusqu'au tempo bas. Base aérobie, récupération active, sorties faciles.

Endurance - 90 min 20 séances - TSS 42 à 83 - Zwift 1.5 à 5/5 10

Même échelle que l'endurance 60 min avec un corps de séance de 75 min. Pour la sortie longue de la semaine.

Sweet Spot - 60 min 20 séances - TSS 48 à 68 - Zwift 2 à 3.5/5 16

88-94 % FTP. Le meilleur rapport charge / fatigue pour construire la puissance soutenue.

Seuil - 60 min 20 séances - TSS 50 à 78 - Zwift 2 à 4.5/5 22

95-105 % FTP. Monter la FTP et tenir des efforts longs à haute intensité.

VO2max - 60 min 20 séances - TSS 48 à 73 - Zwift 2 à 5/5 28

106-120 % FTP. Développer la puissance aérobie maximale. Jamais deux jours de suite.

Mixtes - 60 min 20 séances - TSS 45 à 71 - Zwift 1.5 à 4.5/5 34

Séances combinées : simulations de course, pyramides de zones, sprints.

Over-Unders - 60 min 20 séances - TSS 47 à 79 - Zwift 2 à 5/5 40

Alternance sous / sur le seuil sans repos. Recyclage du lactate, très efficace pour monter la FTP. Une par semaine max.

Semaine type (intermédiaire)

- 1 séance dure (Seuil, Over-Unders ou VO2max) + 1 Sweet Spot + 1 à 2 Endurance (la sortie longue en 90 min) + éventuellement 1 Mixte.
- Phase de base : Endurance + Sweet Spot. Construction : Sweet Spot + Seuil / Over-Unders puis VO2max. Avant course : Over-Unders L05+ et Mixtes L06-L10.

Zwift : copier les dossiers dans ~/Documents/Zwift/Workouts/<ID>/ puis relancer.
MyWhoosh : importer les fichiers du dossier MyWhoosh/ via workout.mywhoosh.com.
